

# SmartZone Enclosure

## Full-Size & Half-Size Enclosures

- **Transparent Cover for Easy Diagnostics**
- **Multiple Mounting & Wiring Options**
- **Sturdy ABS Plastics**

### General Description

The SmartZone™ family of residential and light commercial zone controllers includes a state-of-the-art LED display panel with full text for status monitoring and diagnosis of the entire system and equipment. In addition, each thermostat and equipment terminal has its own color-coded LED allowing for easy monitoring of thermostat and system calls. Because of these revolutionary indication features, a custom transparent-covered enclosure is necessary to utilize the full functionality of the SmartZone products. This enclosure is included with every controller and allows the installer or end-user to easily see exactly what is happening with the system at any given time.

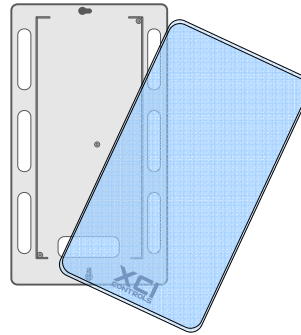

**NOTE:** This enclosure is included with every SmartZone Controller and does NOT need to be purchased separately.

### Mounting & Wiring

- Can be mounted to virtually any surface
- Properly ventilated for most all environments
- Top and Bottom Screw **Key Holes**
- **Slots** for easy mounting in hard to reach places
- **Holes** for most secure fit possible
- Controller circuit board securely snapped and screwed into enclosure base
- **Side Knockouts** for wiring after enclosure has been mounted
- **Bottom Hole** for surface mount wiring on sheetrock or similar
- Innovative Snap-On Lid that can be removed and replaced without interfering with wiring
- Protects electronics from dust and other environmental hazards
- Must be installed in a DRY location

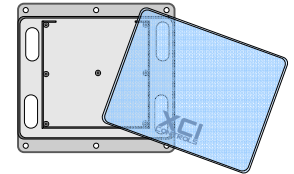

#### Full-Size Enclosure

Included with:  
SmartZonePLUS RZ4  
SmartZonePLUS EC1  
SmartZone-2 & SmartZone-4

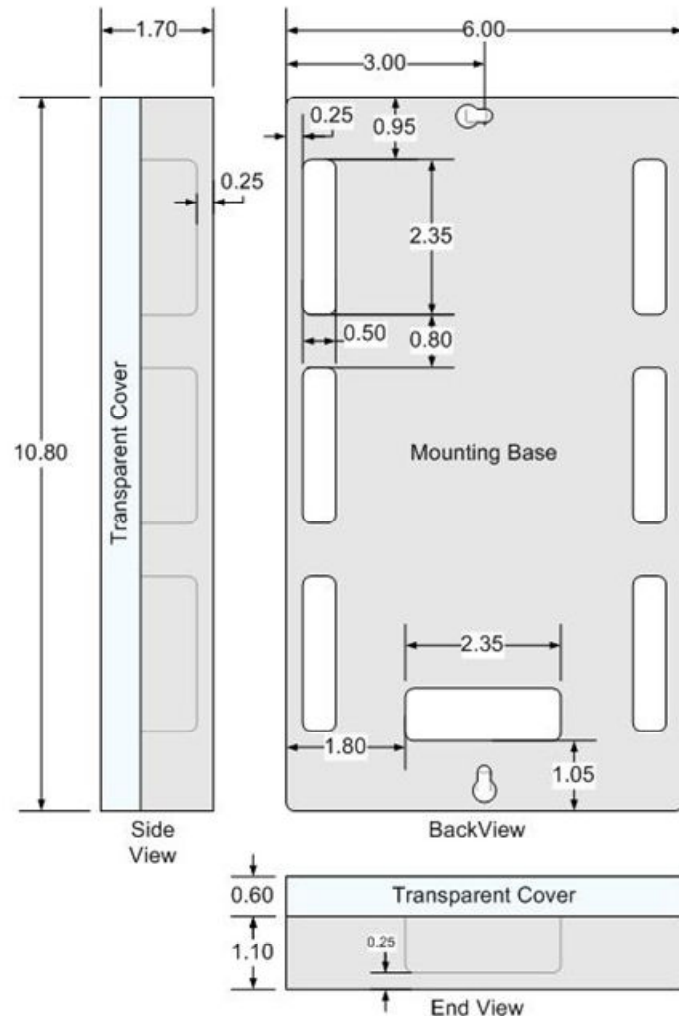

#### Half-Size Enclosure

Included with:  
SmartZonePLUS RZ1
